

# Apprentices are all neurologically unique!

The Do-IT Profiler enables better conversations and reduces the need for expensive assessments.

Supports LSF1 £150 per learner per month (England).

- Quick to set up and easy to use.
- Considers neurodiversity in the context of work and home life.
- Robust data and smart reporting, all in one place.
- Less paperwork freeing up your time.

At work or on the move.

The Profiler can identify conditions labelled as:

Dyslexia	Dyscalculia
Dyspraxia	Autism Spectrum Conditions
Attention Deficit Hyperactivity Disorder	Overlapping Conditions

Accurately capture those LDD\* differences and use them for the individual's future success.

# How the Profiler works

The only screening and assessment tool that considers neurodiversity in the context of work and home life.

1

A quick and accurate understanding of the individual.

2

Recommendations for the individual according to their support needs.

3

An easy to read report for you and the individual.

4

Support and training for staff to have helpful conversations with the individual.

5

Monitor progress and make the right adjustments to help the individual.

6

Detailed data and predictive analytics useful for your organisation.

## People don't always know they have an LDD

Those that are neurodiverse (LDD) will have overlapping difficulties and strengths to a lesser or greater extent.

Do-IT Profiler provides this understanding so that accurate support can be given. Each person is different and a label never describes an individual.

## See the potential not the problem

The individual will have many strengths that could be an advantage to a business such as problem solving capabilities, good analytical skills and communication skills.

Do-IT Profiler allows these hidden talents and novel skills to be identified for the future success of the individual.

## Supporting your staff

Harnessing and maintaining all talent is essential to your business. This means understanding how to effectively support staff with their training needs and supporting their apprentices on programme.

Do-IT Profiler helps you do this efficiently.

We know that gaining an understanding of neurodiversity can seem complex. If you would like to learn more, please visit our website.

We also offer a range of neurodiversity workshops that can upskill your workforce.
